

**THE WORLD'S ONLY TOOL THAT
ACCURATELY PREDICTED "BREXIT" ...**

**...ALSO JUST CORRECTLY FORECAST
A DONALD TRUMP PRESIDENCY...**

...DAYS BEFORE BOTH EVENTS HAPPENED...

**HELPING TO HAND-DELIVER BIG
GAINS IN JUST DAYS' TIME**

INTRODUCING...

"THE KISSINGER CROSS"

This could be used to take the guesswork out of trading — potentially handing you the precise moments to buy and sell... for long-term gains as high as 1,616% over and over.

Hi, Jim Rickards here...

Right Now I'm going to introduce you to a true breakthrough.

It's my simple, proprietary timing indicator that even a 6-year old child could instantly spot.

I call it the "**Kissinger Cross**" – *named after Henry Kissinger, the former Secretary of State. I'll explain why I've named this indicator in his honor in a moment...*

And while Henry Kissinger hasn't endorsed what you're about to see, spotting these "**Kissinger Crosses**" in the financial markets can hand-deliver you THREE big advantages over every other investor:

- ✓ First, you could be able to see the biggest and fastest potential investment gains -- *months before they happen...*
- ✓ Second, you can routinely get the chance to capture repeatable gains as high as 1,616%...
- ✓ And third, you could make up to 16x your money in a way that can be safer than how most people trade stocks.

To prove how simple it is to make money using this technique, I'm going to show you three stock charts based on series of winning back-tested trade examples right now.

Take a look at this one, ticker symbol AEM:

It's tough to know when to buy or sell.

Is AEM a good trade or a bad one?

Now take a look at how crystal clear the trade becomes when you overlay my Kissinger Cross tool...

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

The Kissinger Cross tells you exactly when to strike. The play went on to make 42% or annualized gains of **184%**.

Here's the next one, ticker symbol EUO:

When most people look at this stock chart, this is how they see it.

Not me.

Here's how I see it, when I overlay my Kissinger Cross tool...

In just a simple glance you know exactly when to jump in.

Buy at the Kissinger Cross and you could have turned every \$1000 into \$1,500.

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

Finally, the third... ticker symbol UPP:

And here's the exact moment the Kissinger Cross happened...

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

In at \$22. Out at \$26.

Simply from spotting the ***Kissinger Cross***.

Why have you not heard about this before?

Because this cross is the result of a proven formula that has been used almost exclusively by the highest-ranking government officials.

In fact, five presidents have relied on this exact pattern to help them solve the world's most complex problems...

And when used properly this same formula has been used to end WWII... to locate crashed commercial airliners... to predict a space shuttle disaster beforehand... and much, much more.

In fact, I've personally used a math formula behind the ***Kissinger Cross*** to successfully predict terrorist attacks for the CIA and department of defense (and yes, those attacks were avoided).

A little later I'll share with you the story of how I accidentally discovered this formula...

But there are two critically important things you need to know right now.

- ✓ First, as far as I know, no one's ever used this magic mathematical formula to predict financial markets before now.
- ✓ Mark my words: This is unlike anything you've ever seen.
- ✓ And second, I'm looking for just 200 people to learn how to put these Kissinger Crosses to work in the markets today. I'll share more on the exact reasons behind our strict limit in just a moment.

The Kissinger Cross is so *simple* that *any* investor -- from someone starting today to a seasoned trader -- should use it.

And it's so *profitable* that it could have turned \$1 into up to \$160...

Over and over and over again.

That's what I'm going to show you right now.

Simply follow the blueprint you're about to see, and you could bag potential gains like...

- ✓ **671% gains from the latest Chinese computer hack...**
- ✓ **1,058% gains from the oil markets...**
- ✓ **And 1,616% gains from the Treasuries markets...**

I'm going to show you everything you need to know to start using this Kissinger Cross technique today.

But you need to get all of this information right now.

That's because we may be forced to remove this from the internet at any moment.

See, more than nine investment firms have tried to get their hands on the Kissinger Cross secret, including bankers at CitiGroup.

And in recent weeks, the owner of a Boston-based brokerage firm (with over 200 clients) paid me a lot of money to try to obtain this secret for him and his clients.

This method is in high demand.

There's no time to waste.

So let's get started...

So Simple *Anyone* Can Use It... So Powerful That *Everyone* Should Use It

You can use my Kissinger Cross if you've never bought a stock before...

You can use it if you have a 401(k) or IRA...

You can use it if you trade in and out of stocks in your brokerage account...

You can use it if you're near retirement... or far from it.

And you can use it no matter what amount of money you have to start -- be it \$500 or \$5 million.

All you need to do is follow the exact Kissinger Cross moments I lay right at your feet.

Take a company named **Check Point Software Technologies, for example.**

The company is a cyber security contractor.

Because of my close work as an advisor to the U.S. government... I've known America is at risk of cyberattacks from countries like China.

For the past two years the company has done well as government and U.S. business looks for cyber protection.

In fact, if you had simply bought the stock and held over the past two years, you'd be up 26%.

That means every \$10,000 would have turned into \$12,600.

Not bad, right?

But unless you're an advisor with deep government connections and top-secret clearances, you wouldn't ***specifically*** know when to buy or when to sell.

In fact, there's nothing special when you look at the chart of this software company. Here's how most people see it...

Looks like a normal chart, right? Lots of ups and downs.

But look at how clear the buy and sell moments become when you overlay the formula behind the ***Kissinger Cross***...

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

You see with **perfect clarity** exactly where to time your buy.

On October 15, 2014, my overlay spotted a ***Kissinger Cross***.

This indicates that CHKP was a “buy”.

Now take a look at this...

On November 17, 2014 the overlay flashed another *Kissinger Cross*.

This one told us it was time to sell.

But had you followed those two simple Kissinger crosses in the way I recommend... you could've grabbed **670%** gains in less than one month.

That turns every \$10,000 invested into \$67,100.

And that's more than 47 times the gains you would have seen by simply buying and holding the stock.

Amazing, right?

It gets better...

Because there are plenty more examples of how the Kissinger Cross can work, too.

Including three plays you can make -- today, right now -- to begin to build your own wealth.

These plays have just triggered within the last 24 hours.

I'll give you detail on all three of these plays in a moment. I'll show you how much you could make, and how to buy them as soon as 5 minutes from now.

Think of these first three plays as your fast-track for potentially getting all the money you could ever want in life. Everything that comes afterwards will be the proverbial icing on the cake.

Don't just take my word for it. See the power of the Kissinger Cross in action for yourself...

Know Precisely When To Get In. Know Exactly When To Cash Out.

Most people think that you cannot time the market.

But the Kissinger Cross is hands down the closest thing I've seen for finding the exact moment to enter and exit a trade.

I told you, it's a complete trading breakthrough.

Here, let's walk through another example:

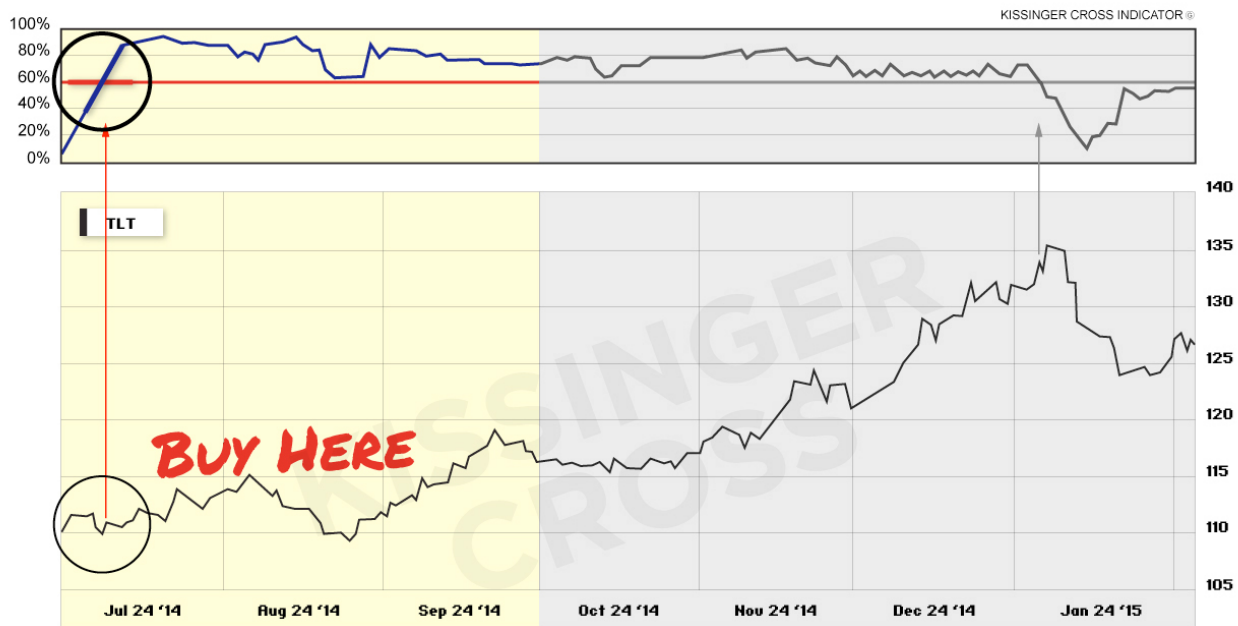

This is the stock chart of an exchange traded fund call TLT.

Now let's overlay the Kissinger Cross formula...

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

The Kissinger Cross flashes.

You buy.

Now take a look again...

Buy in.

Sell out.

Collect your payment.

In this example you would have seen **1519%** in just **three months**.

That turns every **\$10,000** into **\$151,900**.

That's not a bad living. For most people, that's enough to quit their jobs and retire comfortably...

True, huge winners like this are rare. And not every trade will be a success, but it's the perfect demonstration of the investing power that The Kissinger Cross indicator can unlock for you.

If you've been looking for an unusual way to fund your retirement...

Or if you're simply looking for additional stable income streams to protect yourself from today's erratic stock market...

You're going to want to put **The Kissinger Cross** to work for you right away.

And as long as you're one of the first 200 people reading this message today, there's room for you to get "in."

And let me just say, using The Kissinger Cross on your own isn't difficult.

I'll show you how today.

Here take a look at another example...

Kissinger Cross Spots

208% Gain In Just 60 Days

This time we're looking at a chart of DWTI.

DWTI is what's called an "inverse fund."

You buy it like any other stock in your brokerage account.

Except it's special. It goes up by \$3 every time the price of oil goes down by \$1. If you know that the price of oil is about to drop... buying DWTI is the way to make money.

But when should you time your buy?

It's hard to tell when you look at charts the way most people do...

There are lots of little up and downs, right?

Now take a look at what happens when you overlay the formula behind the Kissinger Cross...

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

See what happened there on June 2, 2015? The first Kissinger Cross flashed.

At the time oil was still at \$66 a barrel. It was the time to buy DWTI.

Over the next few months... the price of oil dropped to \$43 per barrel. That's a 34% drop.

But because DWTI is an inverse oil fund, it shoots through the roof when the price of oil drops.

And that's what happened. Until on August 24, 2015, the second Kissinger Cross flashed.

If you had sold where the tool indicated, you would've captured gains of 208% in just 2 months.

That's an annualized gain of **1,248%**! That's amazing.

Now that you've seen the proof of the simplicity and power of the Kissinger Cross, listen closely as I share some critical information...

The Most Closely Guarded Secret of the CIA, Pentagon and MI6

As I mentioned earlier, there's a very good reason why you haven't heard of this before now...

But before I tell you, I have to come clean about something...

I did not invent this criss-cross pattern.

And I can't take credit for it.

It was taught to me by America's most controversial security advisor -- Henry Kissinger.

The year was 1981.

Kissinger had left his posts as the Secretary of State and National Security Advisor.

At a private luncheon, he agreed to teach his best secrets to small group of up and comers in the intelligence field.

As a recent graduate from Johns Hopkins' School of Advanced International Studies, I was lucky enough to be in that room.

The #1 secret Henry Kissinger shared that day was...you guessed it...the theory behind what I now call ***the Kissinger Cross***.

Here's how it was described to me...

A Strategy That's Been Saving Lives Since 1941 Can Now Accurately Predict Where Stocks Move Next

Imagine for a moment the famous story of how Navy SEAL Team Six killed Osama Bin Laden.

The SEALs faced three challenges:

1. Developing a list of probabilities of where Bin Laden could be hiding...
2. Gathering enough information about the situation to narrow down to the most likely probability of where Bin Laden was...
3. Acting before the Bin Laden moved to another location...

If the SEAL team acted too early, without enough information... they could have ended up raiding the wrong location.

And if they waited for enough information to be 100% certain, Bin Laden could have moved.

They needed to find the perfect mix of time and information to strike...

See, the art of counterterrorism or geopolitics, Kissinger said, is to find what are called "Intelligence Crosses."

An intelligence cross is a green light telling you to take action.

It's the cross-section where you have enough good information to be smart AND still have time to effectively act.

It's the perfect strike point of information and time.

And it's exactly the kind of tactic the SEALs used to accurately strike and take out America's most feared enemy.

Here's the trigger point circled on the graph:

It's no exaggeration to say that the theory behind the Kissinger Cross has been saving lives since 1941.

Presidents and world leaders have used it to change the course of history...

The formula behind the Kissinger Cross won WWII for the Allies.

It helped us win the Cold War...

I've personally used this cross moment in the intelligence community to help the U.S. government prevent terrorist attacks.

But, to my knowledge, out of everyone that Henry Kissinger taught this indicator to at that luncheon in 1981...

I'm the only person that's taken it and applied its secret power to financial markets...to create what I call the "Kissinger Cross."

For more than 34 years I kept this secret to myself... and used it to build my career in law... in finance... and in my government intelligence work.

But now, after three decades of back testing...

And after partnering with one of the world's leading financial research firms...

I'm finally ready to share it with serious readers like you.

Predicting Triple and Quadruple Digit Gains in the

1980s... 1990s... 2000s... and 2010s...

What I've discovered in my back testing will completely floor you:

- I found tons of triple and quadruple-digit winning trades going back as far as the early 1980s...
- The average annual return among these winning trades was 1,591%...
- And all were identifiable using the Kissinger Cross method...

Take the chart of a fund with the ticker symbol: GLD.

It's another display of the Kissinger Cross indicator's power.

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

GLD is the popular investment that tracks gold. On July 1, 2011 the first Kissinger Cross flashed "buy", right as GLD was bottoming out.

Over the next three months, GLD rose by 22%. Until this world's only tool flashed “sell” on September 1, 2011.

Now, that's a nice return.

But had you used the specific type of investment strategy that the Kissinger Cross works best with, you could have instead made **a huge 9,194% return...** in the same three-month period.

That's enough to turn a modest \$5,000 investment into more than \$459,700 in pure profit.

Double your starting capital, and now you're close to collecting a cool million in profit.

Of course, back testing is one thing. And no investment strategy is foolproof or guaranteed to return these kinds of profits.

I wanted to know if The “Kissinger Cross” could spot these trading recommendations in REAL-TIME.

So here’s what I did...

365 Beta-Testers and 162% Gains Later... the Strategy Is PROVEN To Spot Winning Trades in REAL-TIME

Earlier this year I invited a small group of 365 readers to beta-test this strategy in real-time...

When a Kissinger Cross flashed, I sent them out urgent buy instructions.

When it was time to get out, I sent out sell instructions.

Would it work?

Would I succeed in my mission of showing readers how to rake in short term profits using this breakthrough cross moment as a buy and sell signal?

I wanted to find out.

Take United Rentals Inc. (URI).

URI rents equipment to oil drillers.

Since crude oil prices fell in 2014, I had a hypothesis that spillover effects would impact other industries closely connected to the oil sector.

So, I plugged the incoming data into my math formula using Kissinger’s strategy...

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

Then, on February 24, Kissinger's Cross flashed on my screen.

A downside trade was triggered.

We had enough information that URI would soon fall and still plenty of time to act before the profit opportunity was gone.

I emailed readers right away with urgent instructions.

I recommended they buy a specific type of investment that goes UP when URI goes DOWN.

And just like the Kissinger Cross predicted, URI took a tumble...

Shooting my recommendation straight to the moon.

Remember, this was a REAL-TIME trading recommendation.

I wasted no time emailing readers -- telling them to book 162% profits thanks to the method.

And here's the best part...

Based on everything I'm seeing, you could realistically expect to see...

20-30 Chances To Double Your Money Each and Every Year

Take another REAL TIME recommendation the Kissinger Cross spotted...

Ticker Symbol: CAR

That's the ticker symbol for Avis Budget Group, the car rental company.

On Jun. 16, 2015, my formula produced a clear Kissinger Cross that indicated CAR was set to crash.

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

Again, this was a real trade that I recommended to my readers.

I immediately gave my readers very specific instructions on how to profit when it did.

All they had to do was follow those simple directions... then wait for the second Kissinger Cross to appear.

They didn't wait long -- the second Kissinger Cross flashed again on July 10.

We rushed out an email to readers recommending they sell their investment for a return of 150% in under a month. **That's an annualized return of 1,800%!**

The Kissinger Cross flashed again just days later.

This time it flashed a crash in the Emerging Markets.

You could have made **841% in a month** on EEM -- a popular Emerging Markets ETF.

The first Kissinger Cross shoed up on July 30, 2015 -- your trigger to enter the trade.

Then on August 28, 2015 -- your received your trigger to exit the trade.

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

Get in.

Get out.

Enjoy triple and quadruple digit returns.

That's the potential of this indicator.

It worked again with the chart on GSG...

Gains of 230% were possible.

You would've entered the trade at the first intersection on June 29th... and exited a month and a day later on July 30, giving you whopping annualized gains of **2,760%**!

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

And again on a big move in the Japanese fund DXJ.... And my readers who got in in time and followed my recommendation saw 110% gain in just two months or annualized returns of 660%:

[CLICK HERE TO OVERLAY MY KISSINGER CROSS TOOL](#)

As you can now see, the Kissinger Cross is a proven technique for spotting when to get in and when to get out of trades...

Using a math formula that predicts outcomes based on time and information.

Right now I'm going to show you a sneak peak at that math formula. I'll also show how I've specially designed this strategy to give you limited risk but unlimited gains.

Then I'll show you how to get your hands on the three REAL TIME Kissinger Crosses that have just triggered -- each one with the potential to hand you quick strike gains.

For now you can rest easy, knowing there's a proven math formula that spots these Kissinger Cross moments...

The 203 Year-Old Formula that Shows this Technique Works

Here's the exact formula that generated all of the Kissinger Crosses I showed you before ...

$$P(C|E) = \frac{P(E|C) P_{prior}(C)}{\sum P(E|C') P_{prior}(C')}$$

This equation is called "Bayes Theorem" by mathematicians.

It was discovered in 1763 by Reverend Thomas Bayes. And it's worked for two centuries.

In fact, it's been used by men like Henry Kissinger in secret government work for decades.

This formula can be applied to almost anything: Stopping terrorist plots... finding lost airliners... and now, picking the right investments.

It looks intimidating, but anyone can understand what it says. And don't worry.

You do NOT need to remember this to use Kissinger Crosses.

In fact, I've figured out a way to simplify the process for you.

But I want to explain how the formula works to you so you know it's real...

The left-hand side of the equation, $P(C|E)$, you make some educated hypothesis we have using the best information available.

Then, you assign a percentage of likelihood that result. This can vary from 50% (really just a best guess) to 95% (a strong thesis).

Then, you enter data into the top part of the right-hand side of the equation, $P(E|C) P_{prior}(C)$. that would be likely to appear only if the thesis is valid.

On the bottom right-hand side $-\sum P(E|C') P_{prior}(C')$ – you enter data that includes results different from the one you're expecting to happen.

As the numerator grows, the probability of your hypothesis being correct goes up.

That's the key.

As soon as the equation spits out a result above a 60%... the first Kissinger Cross flashes showing you the odds are in your favor, and to buy.

Then, you keep plugging the data into the equation. **When the equation gives you a result below 60%, the second Kissinger Cross flashes again - telling you the odds have fallen out of your favor, and to sell.**

On its own, it's the most powerful strategy the world's ever seen

But earlier I mentioned an important "tweak" I made to this strategy. One that gives you unlimited upside potential but always known and strictly limited risk.

Let's cover how that works right now...

Safer Than Simply Buying Expensive Stocks Outright

Everything I've shown you today involved two layers of my investment strategy:

First, the Kissinger Cross indicator I've been showing you today.

Second, a specific type of investment that the Kissinger Cross works best with.

Used together, I believe this dual layer is safer than how most people trade stocks or bonds.

That's because the way I use the Kissinger Cross gives you embedded leverage.

That means that every \$1 you invest can return many, many times your money.

In fact, your upside potential with this type of investment is unlimited.

But your risk and downside is always known and limited.

That's the kind of risk/reward you want in an investment.

Meanwhile, most investors continue using a traditional buy and hold method with stocks.

That means they're totally at the mercy of the wildly swinging up and down markets.

But when you use the Kissinger Cross method I recommend you could be in and out with precision strike profits.

Here's what I recommend you do right now...

The Three-Steps You Need to Start Using Kissinger Crosses Today

There are only a three things you'll need today to begin using Kissinger Crosses for big gains.

They are...

1. -- An common online brokerage account...
2. -- Likely as little as \$500 in that brokerage account...
3. -- And something completely new that I'm going to share with you right now...

As I mentioned earlier, our beta-testing phase is complete -- proving once and for all that the system can work to spot real-time movements that could quickly double your money or more.

That's why I've decided to start a brand new research service called ***Jim Rickards' Intelligence Triggers***.

Its goal is simple:

To deliver a small, serious group of readers new Kissinger Cross triggers to your inbox as soon as they happen.

Today I'm letting you try this new service nearly risk-free ...

Here's how it works...

STEP 1: First, I'll overlay all the current charts to find Kissinger Crosses appearing on specific investments in the market...

STEP 2: Then, I'll find the simplest way to play them for big gains. I'm talking about *money making trading opportunities you won't find anywhere else*.

STEP 3: Finally, I'll send you emails -- sometimes as often as once a week, with the exact instructions on how to play these opportunities... the exact set-up, what trade to make, and when to get in and out safely and easily for the most gains.

Now don't worry...

Before you get started, I'll teach the basics you need to know about Kissinger Crosses... limiting your risk... executing the trades and monitoring their performance.

Everything's reserved for you inside your free copy of: ***The Kissinger Cross Handbook: How to Use Kissinger Crosses for Big Financial Gains***.

Inside this roadmap, you'll learn:

The full story of what Henry Kissinger taught me that day in 1981... the exact math formula that makes these crosses so statistically valid... how I've used it to help the U.S. government stop terrorists... how I've personally used it to build successful career in finance... and how you can use it for quick strike profits.

You'll also learn...

- ✓ Why making investments with my Kissinger Cross strategy can actually be safer than how most people trade stocks. (In fact, it can reduce your risk exposure by 25-50% if used correctly.)
- ✓ The biggest mistakes most investors make while trying to capture profits on their own using the Kissinger Cross...
- ✓ What makes Kissinger Cross investing better than better than other technical indicators... trading stocks or ETFs and better than complicated options trading strategies like covered calls or naked puts...
- ✓ How to use the Kissinger Cross strategy in your online brokerage account...
- ✓ How to make these kinds of trades within your Individual Retirement Account (IRA) ...
- ✓ A risk free way to try every single Kissinger Cross trade recommendation I send my readers without risking a penny of your own capital on investing...

Of course, I wanted to make it as easy as possible for you...

So unlike other services that leave with you boring manuals to read, I've took everything to a whole new level and recorded a ten part video series explaining everything.

When you claim your seat at the table with me today, I want you to make a point to watch a video a day for the first 10 days.

Stick with the system and it'll work.

But you **MUST** follow the system as it's laid out. I can't promise what will happen if you try to "go at it alone."

That's why the video series is so important.

Listen, I know I've thrown a lot of brand-new information at you today. That means you probably have some questions about how this all works.

So, let's cover those right now...

Question #1: Why Don't I Keep This Secret to Myself and Milk it for Millions?

The truth is, I *have* kept this secret to myself.

And I have used it to make millions of dollars for myself over the course of my 34 years in law, government work and finance.

And I still do today.

But that hardly means I can't show you how to use it too.

The truth is, there are plenty of Kissinger Cross opportunities to go around for everyone...

Remember, according to my research we should see 20-30 Kissinger Cross setups each and every year.

On average, that means I'll be sending you a trading recommendation about every other week.

Simply wait for my email...

Buy when I recommend.

Sell when I recommend.

And collect any gains that come your way.

Question #2: “This sounds complicated. I'm no math whiz, can I still use this?”

Remember, this method is so simple anyone can use it.

And there will be no tests around the mathematical formula behind the Kissinger Cross.

I'll do all the analysis and overlaying for you.

You don't have to worry.

This is simple.

Think back to the example I showed you earlier.

When the indicator flashes first... you would've bought:

When it flashed a second time... you would've sold.

Get in.

Get out.

Get paid.

It's that easy.

Here you would have seen **1519%** in just **three months**. Though every play may not yield quadruple digit gains, just a fraction of this every few months could build a fortune.

I'll do the math to get the Kissinger Cross...

And I'll immediately email you when that Kissinger Cross is flashing buy... and when it's flashing sell...

I'll also keep track of all of the different Kissinger Cross investment opportunities for you so you know how well each is performing... and when to sell...

Question #3: How much does it take to get started?

We've specifically designed this for *everyone* to be able to use.

Remember, it only takes as little as a few hundred dollars to get started.

But if you want to play it safe, you could start out by making "paper trades".

When you do that, you can see if the trades are right for you without risking any money whatsoever.

Of course the more money you put into a trade, the more you stand to make.

You won't see triple digit gains if you don't risk some of your money in the market. That's just the way it works.

But the fact remains... you can start small and at your own pace...

Question #4: When could I expect to make money?

Truthfully, you could start raking in profits 30-90 days from now.

This isn't a buy, hold and hope strategy.

Look back to my examples...

You could have seen triple digit gains in matters of months, like...

✓ --- 120% in DXJ in under two months...

✓ --- 162% on CAR in just one month...

✓ --- 841% on EEM...

✓ --- 184% in a matter of months...

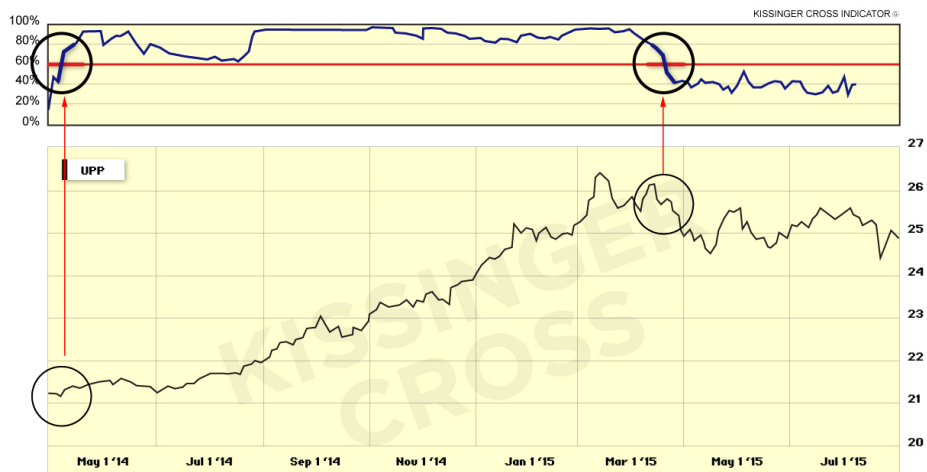

✓ --- Turn every \$1,000 to \$1,500 with EUO

✓ --- 671% gains from the latest Chinese computer hack

✓ --- In at \$22 and out at \$26 on UPP

✓ --- 1,058% gains from the oil markets...

✓ --- 1,616% gain from the Treasuries markets...

✓ --- 230% on GSG

As I've been saying the Kissinger Cross is a trading breakthrough.

The key word there is "trading," not "investing."

This is get in and cash out -- with the estimated profit periods ideally no longer than 90 days, max.

So here's what we're going to do...

Today's The Perfect Day For You To Join Us

As I've been mentioning, there's a strict limit to new members.

We're taking just 200 per day.

Why?

Because I made it very clear to my publisher that I wanted to provide hands on support for each and every member of my ***Rickards' Intelligence Triggers*** service.

If I'm going to put my name on something, I want it to be the best.

To provide you with that ongoing support we've hired a full team of customer care associated to our Baltimore based offices.

They're standing by to answer your most pressing questions about your subscription benefits.

But because I only wanted the best, the team is specifically designed to be small. That means there's a strict limit on calls they can handle...

Which, in turn, puts a strict limit on members we can take today.

If you're reading this right now, GOOD NEWS -- there's a spot open and waiting for you.

But if you fail to move quickly during these final steps, someone else may hop in your place. This offer may shut down. Perhaps for good.

Ironically you can consider this moment right now as a Kissinger Cross moment of your own.

You've watched this message today, so you've seen all my information and proof.

You still have time to act before someone takes your spot

So the flash point for you is right now.

Will you seize opportunity and be rewarded?

Or watch life -- and potential profits -- pass you by?

And, of course, there's a second reason you need to act right now...

The Next 3 Kissinger Crosses Have Just Intersected. Don't Miss Out.

I'm not trying to pressure you... but just tell you about the urgent opportunity sitting in front of you right now.

Three Kissinger Crosses have recently triggered.

These are now flashing "buy" on the screen in front of me.

Any of the three could make you as much as 200-370% or more in 90 days or less, with less risk than simply buying and holding stocks.

You could buy into all three once I hear from you today.

You'll be "in" the trade less than 15 minutes from now.

I've covered all three of them in a second special report called, ***Three Kissinger Crosses that Could Deliver you 200-500% Returns.***

Like everything else I mentioned today, this special report is yours FREE when you join Rickards' Intelligence Triggers today.

If you're at all concerned about how it'll work out, don't be. I've got you covered...

Take The Next 60 Days to Try My Research

For a limited time only, I'm letting you take advantage of my "no-questions-asked" guarantee for 60 days...

So how much does it cost to get started?

We'd like to extend to you an invitation to become a charter member of *Jim Rickards' Intelligence Triggers* today — at a rate that's much less than what we'll ask everyone else to pay when this limited-time offer expires.

Your subscription today includes:

- ✓ **Your Intelligence Triggers Kit and Video Series -- yours to keep no matter what.**
- ✓ **You get automatic enrollment in the *Jim Rickards' Intelligence Triggers* trading research service...**
- ✓ **You get your first trading recommendations... with more to come (at least one recommendation every two weeks).**
- ✓ **Plus everything else I promised today...**

All free with your risk-free trial of Jim Rickards' Intelligence Triggers

Simply click the “Subscribe Now” button that you see below this letter now.

Hitting this button does not obligate you to anything. You'll just be directed to another page with additional information about this offer.

We Want You To Be 100% Satisfied With Your *Jim Rickards' Intelligence Triggers* Subscription

Here is my guarantee: If for whatever reason you want to cancel your subscription in the first 60 days, just let us know by giving us a call or shooting us an email. We'll give you a prompt refund, no questions asked. All you'll end up paying is a small 10% processing fee.

Why the processing fee?

Well, believe it or not, there are still people out there who try to “steal” our work. They buy the service, grab the recommendations and then cancel...

We've simply poured too many resources into this project to let these deadbeats get away with that. This 10% fee protects the serious readers who choose to invest in Jim's research, while also discouraging fraud.

This checkout page has an order form that's fast, safe and 100% secure.

We are using the latest complex encryption technology we can find to protect your data though the entire ordering process.

Ultimately, I've shown you everything I can show you at this point...

I told you how I discovered this secret...

I've proven that you can use it to easily multiply your money in the coming days...

And I've given you a nearly risk-FREE way to try it all for yourself.

Now the choice is yours whether you harness the power of the Kissinger Cross indicator.

All you need to do to take advantage is hit that "Subscribe Now" button right now...

See you on the other side,

Jim Rickards
Editor, *Intelligence Triggers*
November 2015

Got Questions?

Are you still here? That's okay. I understand you may still have some questions. And I'll do my best to answer them right here so that you can feel 100 percent comfortable with your almost risk-free decision today.

"What Happens if the Stock Market Crashes?"

Answer: Believe it or not, but the Kissinger Cross works BETTER in periods of high volatility!

For one, it has the power to unlock trade opportunities that only occur in dropping markets...

If you remember, I already showed how you could have made as much as 1,508% as oil prices fell, thanks to the Kissinger Cross strategy.

I would go as far as to suggest that if you are afraid of a stock market crash, then you simply **MUST** get your hands on the Kissinger Cross indicator.

That's because this crisscross can also unlock trade opportunities that can help you protect your portfolio from loss in the event of a crash.

In fact, a report from *MorningStar* said that, "Worried about a crash? Other than selling your holdings, (these types of trades) are probably the simplest strategy to insure your portfolio against losses "

Don't be stuck out there without having this powerful protective tool in your pocket! Click the "Subscribe Now" button to get started.

"How is the Kissinger Cross strategy different than the IMPACT Strategy Jim uses to exploit Currency Wars?"

Answer: You might already be familiar the IMPACT strategy, which he uses to profit from currency wars. So it's natural to wonder how this Kissinger Cross strategy is different?

I can tell you this: If you like my IMPACT System, then you will simply LOVE the Kissinger Cross and *Rickards Intelligence Triggers*. As you will see, the Kissinger Cross opens up *even more* creative trade opportunities. Including trading opportunities that have nothing to do with currency trading.

On the other hand, if you've never tried my IMPACT system – or if you had previously decided that currency trading wasn't for you – then I think you will find that the Kissinger Cross is a more straightforward approach.

As I promised you today, all this Kissinger Cross does is open up new trading opportunities you've never seen before in a very simple way.

In fact, I've just opened up a brand new trade opportunity a few weeks ago. This one play alone could possibly double your money, or maybe make you even more. But only if you take action now...

"Can I make these kind of Kissinger Cross trades in my IRA?"

Answer: It depends on the broker. If you have any investing experience, however, it's very highly likely your broker will allow you to make these trades.

Everything about setting up a brokerage account is covered in the *Kissinger Cross Handbook*, including information related to trading this strategy using your IRA.

“This all seems to be too good to be true... What’s the ‘catch’ on this offer?”

Answer: Congratulations. Skepticism is not only healthy, it's the mark of a smart investors. You should investigate before you jump into anything.

That's why we are giving you 60 days to check out this opportunity. I want you to see firsthand — safely — that my Kissinger Cross strategy can make you money more safely than how most people trade stocks.

Once you've studied it and you're totally confident it works, you can start making money at your own comfortable pace. You have 60 days to test everything out, either with paper trading or with as much money as you want to risk.

If you don't get the results you want, just ask for a refund. What could be safer or easier than that?

The only “catch” is that we will shut down this offer once we reach our limit of one in 100 subscribers (or 1% of our total readership).

And you can only get this offer by hitting “Subscribe Now” before we reach our limit and before we shut this offer down...

Remember, hitting this button does not obligate you to anything. You will simply be redirected to another page with additional information about this special offer.

"Is This Too Difficult to Learn?"

Answer: You'll be wondering if you need to be a math-whiz to make this strategy work, or if it involves complicated formulas and the like.

It is true that the Kissinger Cross indicator is based on the application of a powerful mathematical formula. However, if you use this research service as it is designed, it requires zero math skills to start making money.

In fact, if you can add up $2 + 2$ in your head, then I guarantee you can understand, and potentially profit, from this information.

Of course, when you try out ANYTHING new (from riding a bike to buying your first stock)... it takes a little bit of practice at first to get it right.

But we've tried to put everything you'd need to know in your free copy of the *Kissinger Cross Handbook*.

Plus keep this in mind: There's a phenomenon described by science as "the curse of knowledge." It's a cognitive bias that leads better-informed people to find it extremely difficult to think about problems from the perspective of lesser-informed people.

That's why you'll often see "beginner's luck" come into play. Because someone coming into something brand-new can still see all the angles — without the bias.

By coming into this Kissinger cross strategy brand new, you won't have the "curse of knowledge" at all...

Instead, you'll be coming at this fresh and ready to see all the opportunities to make money, the very same way I look at these opportunities.

Who knows? You might even get a taste of "beginners luck" that can not only give you back your money you pay for this service within a few short weeks, but possibly enough money to put you on the path to financial freedom that you deserve.

But that's only if you hit the "Subscribe Now" button right now and take advantage of this limited and generous *Rickards Intelligence Triggers* offer before we hit the 1% limit.

"If this is so great, why are you not giving this secret to hedge funds to use?"

Answer: I AM making this available to hedge funds. In fact, many hedge fund managers will likely see this offer.

That's the opportunity for you here. That is, if you are NOT a hedge fund manager or if you don't work on Wall Street.

In the past, some investors have paid more than \$500,000 in order to participate in the Kissinger Cross secret.

"Is there any danger of too many people learning the Kissinger Cross strategy, and spoiling it for everyone else?"

This is a HUGE concern for me and the few people who are using the Kissinger Cross indicator right now. The fact is, if too many people do find out about this, it is possible this would spoil the “profit party” for everyone.

That’s the very reason why we are limiting this offer to the first 1-in-100 responders (or 1% of our readers.)

If you are reading this, there is still time. It’s entirely possible that hundreds of readers are also looking at this offer at this moment. So don’t wait. Hit the “Subscribe Now” button to find out how to get started now...

You Can Review Your Order Before it's Final

“ Will I need to be chained to a computer all day to make this work?”

My strategy in *Rickards Intelligence Triggers* is NOT day trading. It is not about sitting at a desk all day, tied to your computer. In fact, I designed this service specifically to help you do MORE with LESS...

I would guess that even if you have zero trading experience, you can make the Kissinger Cross work for you in less than an hour per week.

In short, this doesn’t take much time at all to use. That’s because the Kissinger Cross indicator I’ve been showing you shoulders most of the work.

I apply the math formula, generate the indicator, which indicates the trade opportunities...

Then, at least once a month, I’ll email you a new trading recommendation.

From there, it is up to you to decide if you want to make a trade – and how much of your capital you want to allocate to each trade.

“Why do I need your service, *Rickards Intelligence Triggers*?”

The fact is, if you know how I apply the math behind the Kissinger Cross indicator then maybe you don’t need my service.

I’ve tried to be completely transparent throughout this entire presentation. I’ve tried to put out all of our cards on the table. With what I’ve given you today, you are more than welcome to continue investigating this on your own...

But that said, you can save yourself a lot of time and heartache by simply responding right now and getting your copy of the *Kissinger Cross Handbook* and seeing this strategy laid out step-by-step.

We've already done the hard work for you in this handbook. You can try it out practically risk-free for 60 days. Just hit the "Subscribe Now" button for all the details.

Hitting this button does not obligate you to anything. You'll just be directed to another page with additional information about this offer.

“Can I use my regular brokerage account to apply this strategy?”

If you've ever traded stocks in your current brokerage account, then chances are you can use this Kissinger Cross strategy in your regular brokerage account with possibly a few minor modifications.

The good news is that any modifications you might need to make are easy to make. Often times, they can be made using a quick email or phone call to your broker. It's even possible to use this strategy using your IRA.

You'll find out everything you need to know about setting up these kinds of trades in your free copy of *The Kissinger Cross Handbook*

The Kissinger Cross strategy is not like trading stocks, ETFs or other trading strategies you may or may not be familiar with...

There is no writing of options, as you'd need to do with strategies based on covered calls or selling naked puts.

There is no shorting of stocks.

It is not related Foreign Exchange (FOREX) trading, or Futures or Commodity Trading, either.

Using the Kissinger Cross indicator is a brand new strategy. But have no worries here. Because we'll tell you exactly how to set up your brokerage account (or any brokerage account) to trade in your *Kissinger Cross Handbook*.

Hit the "Subscribe Now" button to see how easy it is to get this secret today...

“Does this strategy involve trading options?”

The Kissinger Cross strategy is based on a mathematical formula.

It's been used (often in secret) for hundreds of years now. It's helped predict and unlock complex human behaviors – from breaking the codes of enemy submarines... to influencing global policy... to helping the CIA pinpoint terrorist activities.

I've discovered that this strategy is especially powerful when applied to a certain section of the options markets.

But what I've discovered is NOT options trading like you've ever seen before. There is no writing of options, as you'd need to do with strategies based on covered calls or selling naked puts.

One noted tech magazine called this kind of strategy, "*the one chance for an everyday person to get rich.*"

This is not a complicated "advanced" options trading strategy. Instead, the Kissinger Cross strategy is about opening up simple and safe trade opportunities within the financial markets – including incredibly lucrative plays within the options market.

Don't miss it... hit the "subscribe now" button, right now...

You Can Review Your Order Before it's Final

“How much does this trading research service cost?”

You can find all the details by hitting the “Subscribe Now” button, including how you can get this research service for a significantly discounted price than what we plan to charge in the near future. Remember, hitting this “Subscribe Now” button does not obligate you to anything.

“Can I use this trading research service to collect income streams?”

Certainly. This is a great strategy to bring in extra income.

Let's say this strategy can get you 671% gains a month. What might that look like to your bank account?

If you put a minimal amount... say a measly \$250 into a trade... and got similar returns from your trades every month...

That would be average out to \$20,130 for the year, or about \$1,678 a month from your winners.

For most people, that's enough to fund your retirement or to serve as a nice second income stream. Or if you want, you can reinvest to multiply your wealth. The choice is entirely up to you.

[Subscribe Now](#)

You Can Review Your Order Before it's Final

“How is using the Kissinger Cross strategy ‘safer than how most people trade stocks’?”

Because most investors use a buy and hold method. If you buy and hold, you are totally at the mercy of the markets. Whereas with this Kissinger Cross strategy, you will often only be in the markets for small increments of time, sometimes for as short as 30 to 90 days at a time.

Your free copy of the *Kissinger Cross Handbook* will explain this concept further. But for now, understand that trading like this has the potential to reduce your risk exposure by 25 to 50% if used correctly.

“If this Kissinger Cross indicator is so great, why doesn't everyone use it?”

I have no idea! If anyone knows about this indicator, I'd be shocked if they are NOT using it to make a lot of money.

My guess is that everyone will want to trade using this Kissinger Cross indicator... once they discover its existence.

That said, we are limiting the distribution of this secret to only 1% of our total readership.

You can see the complete offer after you hit the “Subscribe Now” button right now... remember, space is limited, and you can try out everything for 60 days... and you won't be obligated to do anything by hitting the button.

“I'm not a big risk taker. Is this the right trading research service for someone like me?”

I specifically designed this research service for people who want higher returns without high risk. It is a RISK-AVERSE strategy.

In fact, this strategy should be thought of as safer and more “conservative” than the way most people buy stocks...

Why? Because you don't have to take open-ended risks. You don't have to risk your money like most people do... putting 100% of their retirement money in the stock market constantly all 12 months a year — riding stocks up and down at the mercy of Wall Street, the economy... or worse, at the mercy of the Federal Reserve.

The Kissinger Cross strategy is all about giving you the control over your money. This includes how much risk you want to take. The kind of plays you will see on *Rickards Intelligence Triggers* have built-in risk protection.

But on the other hand, if you can't tolerate ANY risk, then this may not be right for you. As with all investing strategies, there will be risk in our recommendations. You could be better off sticking with Treasuries and being happy with 1% to 2% returns.

Only you know your own risk tolerance and what you'll feel comfortable with. The choice is entirely up to you. No matter what, we want you to sleep soundly at night with your decision, which is why we give you our 60-day money-back guarantee.

You Can Review Your Order Before it's Final

“Can The Kissinger Cross strategy truly make me rich?”

Yes, it's entirely possible this strategy can make you rich...

But that depends on how you define “rich.”

If you define it as the ability to make more money, so you can spend more constructive time with your family, go back to college, travel, give more to your church or charity and “be a better you” — then this very well could make you “rich,” indeed.

We believe the Kissinger Cross will make you money. That's why we are offering it to you today with this special offer.

And here's a quick piece of advice: When you start using this research service, I'd encourage you to write down goals of how much you want to make in the next 12 months. Then decide how much to allocate to reach your financial goals. I truly believe that if you use the strategy correctly... you will be pleasantly surprised how quickly you can reach whatever financial goals you set.

“This sounds like a ‘get rich quick scheme’ to me — are you for real?”

This is NOT a “get rich quick” gimmick. Here at Agora Financial, we're in the business of sharing ideas and actionable research that can help you thrive in any type of market. If we published foolish or dishonest material — we'd be out of business.

“Does this involve using a load of technical mumbo jumbo and complicated charts?”

No. There is no technical analysis that you'll have to perform. All you need to know is the specific play, and when to get in and when to get out – at each Kissinger Cross. My team and I do all the hard work for you. Each alert will tell you exactly what to do. You just have to decide whether you want to follow what we recommend!

“I've heard trading systems never work, because it's impossible to beat the market — what makes this different?”

We don't agree it is “impossible” to beat the market.

And if you've stuck with me to this point, I'm pretty sure you don't believe this either...

First off, we all know it's possible to beat the market. You and I could name several famous investors who beat the market all the time.

Second, I showed you today how gains as much as 600% to 1,000% are possible. We've tried to show you all the proof here in this message. It is entirely up to you if you believe our research or not.

But whatever you decide, you're still covered by our 60-day guarantee. Just hit the “Subscribe Now” button now. Hitting this button does not obligate you to anything. You'll just be directed to another page with additional information about this offer.

“Can anyone really do this? Even me?”

YES, anyone can learn to do this. Especially you. Why? Because I designed service specifically for YOU.

For a regular American with an average understanding of the markets who want to better their financial circumstances, who now can thanks to the application of the Kissinger Cross indicator.

Don't wait until it's too late. Hit the “Subscribe Now” button and take advantage of this limited-time offer to while you still can.

You won't be obligated to do anything by clicking this button. You'll just be sent to another page with more information on this special offer.

“What promise do I have that I’ll make money?”

To be completely honest, if you choose NOT to invest in the Kissinger Cross recommendations — then I can guarantee with certainty that you will not make any money on them — and this service will be nothing more than education.

(Not that there’s anything wrong with paper trading to learn this indicator system — but the simple fact is that you can’t make anything unless you’re willing to invest with actual dollars.)

But I do guarantee this service for a full 60-day period. And during that time, if you’re skeptical, which is completely understandable, then please do feel free to paper trade.

By paper trading, you can accomplish two things: First, you won’t risk a single penny. Second, you can prove to yourself that this is the real deal.

And if for any reason (or no reason at all) you decide you made a mistake in the first 60 days, just let us know by giving us a call or shooting us an email.

We’ll give you a refund, no questions asked. All you’ll end up paying is a small 10% processing fee.

But remember, we’re letting only one percent of our readers take advantage of this. So hit the “Subscribe Now” button or else you will risk losing your spot...

“What happens if I waste my time trying out your research service and it doesn't work?”

Nothing ventured, nothing gained! I can guarantee your satisfaction with a 60-day money-back guarantee.

Bottom line, we all want you to be successful and to move forward with piece of mind. That said, we only want people who are serious about learning how to make money using this strategy.

That’s why only one in 100 of our readers will get in (it’s first come, first served). If you are still seeing this message then there are still openings to join. But only if you hit the “Subscribe Now” button and take advantage of this limited-time offer.

[Subscribe Now](#)

You Can Review Your Order Before it's Final

“Do I have to have a large amount of money to invest?”

No! In fact, you don't need *any* money to get started, because you can paper trade as many of the Kissinger Cross recommendations as you like, for as long as you like...

That said, if you want to make actual money you can spend (or reinvest), then yes, you'll need a little money to get started. How much is up to you. You can get started with as little as a few hundred dollars to invest.

But remember, once we hit our limit of one in 100 readers, this offer will shut down. Don't wait until it's too late. Hit the "Subscribe Now" button and take advantage of this limited and generous offer to while you still can.

"If I have questions or am unsure about anything about my membership, can I speak to someone?"

Absolutely. Immediately after joining, we will give you a special customer service number that you can call with any questions you might have about how your membership works and what you're entitled to. You'll also get a special email address for the same purposes.

This is exactly why we are limiting this offer to the first 1% readers who respond. We don't outsource our calls overseas. We want charter members of Jim Rickards' *Rickards Intelligence Triggers* to experience the world-class service they deserve.

Don't wait until it's too late. Hit the "Subscribe Now" button and get started today...

"How soon until get my materials like the *Kissinger Cross Handbook* and first *Rickards Intelligence Triggers* trading recommendations?"

Within 10 minutes of responding today, you can download everything right on your computer, phone, tablet or other device. Just click the button now to get started.

"How often will you and your team be making recommendations?"

I plan to make at least one trading recommendation per month. This number can easily increase based on what the Kissinger Cross is opening up thanks to the recent increased market volatility.

"Is your ordering process safe and secure?"

It is fast, safe and 100% secure. We are using the latest complex encryption technology we can find to protect your data though the entire ordering process.

Once you click the “Subscribe Now” link, you’ll get a chance to review everything before anything is processed. After you have used the same secure order form, you’ll be able to download the reports immediately as Adobe Acrobat PDF files.

“I really want the profits and simplicity you describe — but how can I be sure that everything you said was true?”

Well, if you’re still unsure, here’s what I suggest. Hit the “Subscribe Now” button and try out my recommendations using the Kissinger Cross and the *Rickards Intelligence Triggers* research service for the next 60 days. You can even paper trade our recommendations if you don’t want to risk anything...

Remember, you must act now to avoid getting locked out. Once we hit 1% of Agora Financial’s readership, then that’s it. This special offer will be closed. The choice is completely up to you, but I highly suggest you hit the “Subscribe Now” button now, so you can decide with all the remaining details of this offer.

You won’t be obligated to anything by clicking this button — you’ll just be sent to another page with more information on this special offer.

Thank you for your time, and I hope to see you on the other side! You can still click the button as long as you remain on this page.
